PORTFOLIO

SUMMARY

Computer Science student at Holy Angel University with hands-on experience developing web, mobile, and game applications through academic and personal projects. Familiar with JavaScript, Python, Java, Dart, React, Flutter, and Godot, with a careful, collaborative approach to testing, troubleshooting, and refining software.

EDUCATION

Holy Angel University 2023 – 2027 (Expected)
Bachelor of Science in Computer Science, School of Computing

- Dean's Lister: First Year, Second Semester (A.Y. 2023–2024) through Third Year, Second Semester (A.Y. 2025–2026)
- President's Lister: First Year, First Semester (A.Y. 2023–2024)

Saint Catherine of Siena Academy of Samal
Secondary Education

PROJECTS

PanelTracker — Manga and Manhwa Tracking Web Application 2026
Personal Project | React, Vite, AniList GraphQL API

- Built a web application for managing a personal manga and manhwa reading library.
- Developed dashboard and series detail pages and integrated the AniList GraphQL API for manga and anime information.
- Implemented user authentication, Light/Dark/System themes, and customizable accent colors.

ViVy — Fraudulent GCash Receipt Detection
Collaborative Academic Thesis Project | Testing and Quality Assurance
Team thesis project: a mobile application for detecting potentially fraudulent GCash payment receipts through image processing and machine learning (project stack: Flutter, TensorFlow, OpenCV, Python).
Technical contributions:

- Tested early application prototypes, identified issues, and checked functionality during development.
- Evaluated detection-model results for classification accuracy and potential inconsistencies.
- Assisted with preparing database resources used by the application.
- Helped with minor application fixes and refinements during final revisions.

Shifted — 2D Side-Scrolling Game 2026
Collaborative Game Jam Project | Godot Engine, GDScript

- Implemented a gameplay feature for a collaborative 2D side-scrolling game.
- Worked on selected parts of the scene involving player choices.
  Team repository: github.com/RandelYumul/Shifted

CERTIFICATIONS

Cloud, security and IT: AWS Academy Graduate - Cloud Foundations - Training Badge; Cyber Threat Management; Endpoint Security; CompTIA IT Fundamentals (ITF+) Certification
Data and AI: Data Analytics Essentials; Artificial Intelligence Fundamentals
Web development: Responsive Web Design (freeCodeCamp); JavaScript Algorithms and Data Structures (freeCodeCamp); Relational Database (freeCodeCamp); Frontend Design with Cloud; Full Stack Web Development; Builds Full-Stack JavaScript and AI
Additional courses: Introduction to Data Science; GitHub Copilot Fundamentals
Credential links available on request.

SKILLS

Languages: Python, Java, JavaScript, Dart, HTML, CSS
Frameworks and platforms: React, Vite, Flutter, Godot Engine
Tools: Git, GitHub, Visual Studio Code
Technical areas: Object-oriented programming, API integration, database management, UI/UX fundamentals, quality assurance
Interests: Software development, game development, web and mobile applications
